### **Quick Bio:**

"Multidisciplinary in the world of Superbike Media! Photo, Video, Web or Social Media i'm your quy! Your team needs promotion? Come see me!"

Currently situated in the North Cotswolds it's rather difficult to find relevant camera work and editing jobs as the majority of these jobs are either in the city or much further away. However due to my experience working in the Motorsport industry previously for 8 years (see experience), this has allowed myself to gain further learning, application of skill and working with a multitude of people in this field. PR is a particular skill and whilst working for Jones Dorling Racing (along with providing PR, photography and organisational skills for a few other teams contacted over the years) it has become a crucial skill to take on into the future. I also implemented social media and websites to the race team and currently manage a 1000 person strong page. So to summarise the term to best describe myself would be multi-disciplinary. Also within the sport I have learnt the importance of not only working independently, but also working as a group, as this will be crucial when moving into a corporation where communication is key. This has been my life for the past 9 years whilst continuing education, further education and maintaining two jobs.

#### **Experience:**

Worked for Jones Dorling Racing for 8 years (2006-2014)
Photography, PR, Video, Social Media & Website for JDR
Worked for MSS Kawasaki as PR for one off events (2010-2011)
